

Example: NON-SPAM

Subject: Typo in /debian/README

To: debian-mirrors@lists.debian.org

From: Yan Morin <yan.morin@savoirfairelinux.com>

Message:

Hi, i've just updated from the gulus and I check on other mirrors.

It seems there is a little typo in /debian/README file

Example:

<http://gulus.usherbrooke.ca/debian/README>

<ftp://ftp.fr.debian.org/debian/README>

"Testing, or lenny. Access this release through dists/testing. The current tested development snapshot is named etch. Packages which have been tested in unstable and passed automated tests propagate to this release."

etch should be replace by lenny like in the README.html
